

FORBES ROAD CAREER & TECHNOLOGY CENTER

CDL-A TRUCK DRIVING PROGRAM

Program Duration: 160 Hours

Tuition: \$5,295.00 -does not include permitting costs
Program is eligible for state training grants for individuals who qualify

Monday-Thursday 7:00am-5:30pm (FT) - 4 weeks

Saturday-Sunday 7:00am- 5:30pm (FT) - 8 weeks

Training Location: 5 Allegheny County Airport, West Mifflin PA 15122

Course: The Truck Driving Training program for CDL-A is directly helping to meet the growing workforce needs of the trucking industry. This course allows the student to gain the practical knowledge and hands-on experience necessary to become qualified and obtain employment in a shorter period of time. Customized lesson plans and training aids provide the most accurate, easy-to-understand, hands-on learning experience with an emphasis on safety. After the successful completion of the course, the trucking industry will gain an eligible, professionally trained candidate while bringing the student that much closer to obtaining a good job and a family sustaining wage.

Career Possibilities: When you graduate as a professional truck driver, the career possibilities are endless! Almost everything we eat, wear or use is moved at some point by CDL road transport. Our country's economy depends largely on the availability of safe, qualified drivers in the road transportation industry. According to the Commercial Vehicle Training Association, a healthy transportation industry relies on enrolling students into schools, training them as quality drivers, and placing them into jobs in order to reduce the growing driver shortage, projected to reach 239,000 in the next 10 years. Career Opportunities available to new drivers are vast in industries ranging from natural gas to over-the-road trucking jobs and everywhere in between! While in training you will be exposed to on-campus recruiters and a wide array of companies to apply to even before you graduate the course.

Training Equipment: Our current model year Freightliners are equipped with 10-speed transmissions, tilt and telescopic steering wheels, air ride seats, air conditioned cab and cruise control. The cabs have been designed to provide a mobile classroom with individual seats for each student. 48 foot trailers complete the training units, accurately representing the working trucks you see on the road every day.

Program made available through a Partnership with PIA:

PIA is one of the leading schools in the country supplying drivers to the road transportation industry. PIA has trained and graduated over 9,000 students through our multiple-location training system. PIA prides itself in providing state-of-the-art training with up-to-date, safe equipment similar to what you will experience entering the trucking industry. PIA's quality of training, emphasis on safety and the dedication of the staff to the graduates are what set them apart as a premier training provider in Southwestern PA.

TRUCK DRIVING (CDL) PROGRAM – 160 CLOCK HOURS – TDP-FT; TDP-PT-E; TDP-PT-W

ADMISSIONS REQUIREMENTS

All students must have a D.O.T. physical and drug screening which can only be performed by the PIA Truck Driving Program's authorized D.O.T. Physician. If a student is unable to pass the D.O.T. physical examination, all tuition paid will be refunded upon proof of failure to pass such examination, minus the cost of physical and drug screen.

All student applicants are required to take and pass the Department of Transportation (D.O.T.) mandated drug screen and physical prior to starting classes. The student is obligated to start class within 30 days of taking these exams. When a student fails these medical exams or does not start training within the specified time, the repayment of those exams and any additional fees incurred become the responsibility of the student.

Applicants previously employed by a D.O.T. regulated carrier will be required to complete additional documentation and meet FMCSR standards.

FACILITIES AND EQUIPMENT

PIA Truck Driver Training Centers are housed in modern buildings with unique services and educational features. The training centers provide a driving range for in-vehicle training. Students perform backing, coupling and uncoupling maneuvers and simulated docking at the range/yard site. Students train under city, county and federal highway conditions. The training site has a driving course that is devoted to close quarters maneuvers required for the CDL license exam. PIA maintains its own fleet of current tractor and trailers, affording our students the opportunity to experience hands-on training in the same type of equipment used in the industry.

CDL THEORY/APPLICATION

Course Number: CDL 1001
Prerequisite: None
Credits: None

Course Description: This course is designed to serve as an introduction and then enhance the students' knowledge of his/her new career as a driver in the road transportation company. He/she will learn to make sound decisions by applying the basic driving principles used by safe professional truck drivers' every day. It will form a base for a new career and provide the required knowledge needed to pass the state's Commercial Driver's License written examinations. This course will also teach the student a driver's duties and responsibilities including government regulations, hours of service of drivers, vehicle operating systems, and trip planning that professional drivers utilize daily in their careers.

Class Size: Classes may vary in size at the schools discretion. The program maintains a 4 to 1 student to instructor ratio.

Class Schedule: This program is offered full-time during the day, part-time during the evenings, and part-time on the weekends. Check with your Admissions Representative regarding available starting dates and school holidays.

Textbooks: State Commercial Drivers Manual, "Trucking" Tractor-Trailer Driver Handbook/Workbook, Delmar Thompson Learning Publishers, "Federal Motor Carrier Safety Regulations Handbook", (Title 49 CFR, Parts 40 and 355-397) J.J. Keller & Assoc., 2002; Drug and Alcohol Testing Driver Handbook/J.J. Keller & Assoc. 2000.

EVALUATION CRITERIA

Homework: Students in this course are expected (and should have the ability) to spend appropriate time on homework assignments. Time will be provided during class to discuss assignments.

Quizzes: Outcomes will be checked at intervals through pop and announced quizzes.

Tests: Six tests are given during this course. Make-up tests will be provided in accordance with the schools attendance policy.

Course Outline:

Day/Number:

One/Two: Unit #1, "General Knowledge", and "Cargo Securement"

Three: Unit #2, "Air Brakes", and "Combination Vehicles" Test One
